4 SECTION 4: FIRST AID MEASURES

4.1 Description of first aid measures

Contact with Skin: Remove contaminated clothing. Wash skin thoroughly with soap and water. Seek medical advice if irritation occurs.

Contact with Eyes: Rinse eyes gently with lukewarm water for at least 15 minutes, keeping eyelids open. Avoid strong water jet. Remove contact lenses if present and easy to do. Consult an ophthalmologist if irritation persists.

Ingestion: If small amount is swallowed, rinse mouth with water. Do not induce vomiting. Seek medical advice and show the label or packaging.

Inhalation: Move the affected person to fresh air. Keep warm and at rest. If symptoms persist or worsen – consult a physician.

4.2 Most important symptoms and effects, both acute and delayed

See Sections 2 and 11 for details. May cause irritation of eyes, skin or respiratory tract.

4.3 Indication of any immediate medical attention and special treatment needed

Show the safety data sheet or the label/container to the medical personnel providing assistance. Treat symptomatically.

5 SECTION 5: FIREFIGHTING MEASURES

5.1 Extinguishing media

Suitable extinguishing media:

Carbon dioxide (CO₂), dry powder, alcohol-resistant foam, water mist.

Unsuitable extinguishing media:

Do not use high-pressure water jet – may spread fire or disperse the aerosol.

5.2 Special hazards arising from the substance or mixture

Combustion products: During combustion, toxic thermal decomposition products may form – carbon monoxide and carbon dioxide (CO_x), as well as nitrogen oxides.

Explosive mixtures: Not applicable.

Additional hazards: In case of fire or heating, pressure increase may occur, leading to container rupture.

Do not touch or walk through the spilled material.

6.2 Environmental precautions

Do not allow to enter drains, surface water or soil. In case of larger spills, notify appropriate emergency services. Prevent further leakage or release into the environment.

6.3 Methods and material for containment and cleaning up

Collect with absorbent materials (sand, diatomaceous earth, universal absorbent, acid neutralizer) and deliver in closed containers to a disposal site.

6.4 Reference to other sections

Hazardous combustion products: see section 5. Personal protective equipment: see section 8. Incompatible materials: see section 10. Disposal considerations: see section 13.

7 SECTION 7: HANDLING AND STORAGE

Recommended control procedures

Procedures concerning the control over the dangerous components concentrations in the air and control over the air quality in the workplace – if they are available and justified for the position – in accordance with the European Standards, with the conditions within the exposure place and a proper test methodology adapted to the working conditions.

8.2 Exposure controls

8.2.1 Appropriate engineering controls

Ensure good ventilation of work premises and/or install ventilation systems.

8.2.2 Individual protection measures, such as personal protective equipment

Eye/face protection:

If there is a risk, use protective goggles in accordance with EN 166. An eye-rinse bottle with clean water or eye wash station should be available near the workplace.

Skin protection – hands:

If there is a risk, use protective gloves resistant to chemicals in accordance with EN 374. The glove material should be selected considering breakthrough time, permeation rate and degradation. Regular replacement of gloves is
